

BRIDLE/ACCUMULATOR/ STEERING ROLLER

Cover Type:	Polyurethane
Possible applications:	Bridle/Accumulator/Steering roll are important in any continuous line to maintain the strip tension and control.
Hardness Range:	85-90 Shore A
Available Colours:	Green, Red, Transparent
Recommended Cover Thickness:	Min 10 mm- Max 25 mm
Temperature resistance:	Continuous 90° C/Peak 100° C
Properties and advantages:	Oil resistant cover. Higher coefficient of friction due to added fillers of special grade. Well suited for countering slipping problems with oiled strips. High abrasion resistance. Constant coefficient of friction during usage. Available in various hardness.
Recommended cleaning products:	Water, soap and detergents, alcohol based cleaners.
